Stretton Climate Care
c/o Mayfair Community Centre
East Hope Road
Church Stretton
Shropshire
SY6 6BL

Dear Resident,

A WARM WELCOME TO YOUR NEW HOME

May we introduce ourselves. Stretton Climate Care is a well-established local charity helping our community to become more energy efficient, and moving towards net zero carbon emissions.

For the past 12 years we have worked with many local residents, helping them to reduce their energy costs and improve the energy efficiency of their homes.

Across Shropshire many communities are trying to reduce their carbon emissions. The county as a whole has set a target of net zero emissions for 2030 and our own Town Council, having declared a Climate Emergency are working towards their own reduction target.

When people move into a new home, this is the ideal time to improve the energy performance of the property. This not only increases its value but contributes towards reduced carbon emissions. Our advice is free and unbiased – we are not trying to sell you anything or tell you what to do. One of our experienced volunteers would happily talk through your ideas with energy efficiency in mind.

You may care to look at our website www.strettonclimatecare.org.uk which carries a wide range of our advice sheets and a growing range of retro fit case studies.

We are here to help.

We can be contacted on our dedicated number 07528 493181 or through the contacts page on our website info@strettonclimatecare.org.uk
