

SOUTH SHROPSHIRE CLIMATE ACTION BUILDINGS RETROFIT

EXTERNAL INSULATION

1. External insulation on bungalows

In a trial project in 2012 British Gas funded the installation of external cladding on four concrete slab houses in South Shropshire. The pictures show one of the houses "before, during and after".

2 External insulation of Town Council Offices

Church Stretton Town Council won a Department of Energy grant for external insulation of the Offices and the upgrading of the lighting to LED's. The second picture with the gas meter shows how thick the cladding is.
