Charity No. 1159816

Energy Advice Drop In
The Wellbeing Centre
Church Stretton
Thursday's 10.00 – 12.00

INFORMATION SHEET No. 31 DATE OF ISSUE August 2021

WELCOME

Dear Resident,

A WARM WELCOME TO YOUR NEW HOME

May we introduce ourselves? Stretton Climate Care is well-established local charity which has helped many local residents since 2007 to reduce their energy costs and improve the energy efficiency of their homes.

Things are now moving forward into a new phase, which will affect us all over the coming years:

- The UK has officially adopted the target of Net Zero Carbon Emissions by 2050
- The Shropshire Climate Action Partnership is aiming to achieve this target for Shropshire by 2030.

If you are considering making changes to your new home, it makes sense to plan them as far as possible in the light of the Zero Carbon target, rather than having to adapt them further in a few years' time. Improving the energy performance of your property increases its value as well as adapting it to climate change. We are here to help. Our advice is free and unbiased – we are not trying to sell you anything or tell you what to do. One of our experienced volunteers would happily talk through your ideas with energy efficiency in mind.

You may care to look at our website www.strettonclimatecare.org.uk which carries a wide range of our advice sheets and a growing range of retrofitting case studies.

We can be contacted on our dedicated number 07528 493181 or at info@strettonclimatecare.org.uk

Stretton Climate Care

Recently moved home in the Stretton area?

- Concerned about your heating bills?
- Want to reduce heat loss?
- Want a more energy efficient home?
- Not sure where to start?
- Want free impartial advice?

If your answer is 'YES' to any of the above, please read overleaf.

Caution - Please Read this:

Our Advice Note has been carefully prepared and is, as far as we know, accurate at the date of publication. However, things change very fast in the world of technology and in government schemes. Sometimes parts of Advice Notes become outdated and may not offer best advice very soon after publication. We do our best to keep them up to date with the limited resources we have. Furthermore, our advice may not be appropriate for your particular circumstances. We advise that you get advice from a relevant expert before making changes. We may be able to offer further advice or make suggestions on who to contact if you get in touch with us. We are not technical experts but have many years of offering common sense advice and we recommend you should not rely on our Advice Note alone for making decisions. The national advice centre Energy Savings Trust is a good source of information.
